

**Sage
Anti-Piracy
Campaign**

You wouldn't steal a car. So why steal accounting software?

Using pirated software puts your business at risk. Not only is it illegal, but if you are caught you will lose all your business data, and you face the risk of your reputation being tarnished.

If you purchase Sage software from an unauthorised company, you will be breaching our rights as a software owner. Pirated software means that you will not have Sage Pastel's permission to use this software. It is also a well known fact that pirated software is often infected with viruses that can permanently damage your hardware and software. By using illegal software, you are breaking the law and could face legal action.

Only purchase Pastel Accounting and Sage 50 Accounting software from the Authorised Sage Business Partner listed below.

AccountsTech Solutions Ltd

Tel: +357 2244 4453 Fax: +357 2266 0826
